

DEVELOPER

We have two developer positions available in Cape Town. The Developer is a skilled and passionate individual that works within an Agile Team of talented developers to achieve a common goal. This goal is achieved by developing reusable, quality, scalable and working software that is closely aligned to that of the Group's business requirements.

REQUIREMENTS

Academic

- Minimum requirement is Matric
- Relevant Certifications, Diploma or Degree relating to Software Development

Work Experience:

- 3-5 years proven development experience.
- Develop, test, and maintain high quality application software
- Experience with test-driven development
- Knowledge of Relational Databases, SQL and ORM technologies
- Exposure to graph databases
- Message Queues
- Understanding of the SDLC
- Object Oriented analysis and design using common design patterns
- Knowledge of source control such as Git, Mercurial, CVS, Subversion, TFS
- CI Tools
- Exposure to Agile Techniques, DoD, Scrum, Kanban, Stand up, Sprints, Retrospectives etc.

RESPONSIBILITIES

Coding

- Write well designed, testable and working code based on business requirements.
- Ensure the code is scalable and adheres to security standards
- Deployable in infrastructure provided for release
- Commit to source control in a working state with all dependencies updated.

Quality Assurance

- Code is working and signed off by the client
- All Code Reviews have passed
- All tests are working

Technical Analysis

- Involved in the planning, design and development of the identified DPO systems and platforms, contributing to all phases of the development life cycle

Documentation

- Assist with relevant documentation as and when required

Participation in the Scrum Team

- Actively participate in stand up, sprint planning retrospectives etc.
- Work with team to meet the sprint goal
- Self-Organizing
